

Why Choose Us?

Opportunities for Growth and Education at SCSP

Traditionally, students taking a gap year have pursued research opportunities; however, many students would prefer something more clinically oriented. These future providers represent a highly qualified and motivated, but as of yet underutilized workforce.

In addition to clinical knowledge, the student will gain confidence in their interpersonal skills, patient bedside manner, and have the mentorship of multiple clinicians.

“I firmly believe this was the most valuable experience I had as a young healthcare professional aspiring to become a provider.”

-Paul Marshall, MS, PA-C

Gap Year Program

Provide the ideal environment for the physician to care for the patient.

“Working at SCSP helped me to develop the clinical skills and tools needed to become a more competitive medical school applicant.”

-Lorrie Sartore, DO

Welcome to Skin Care Specialty Physicians!

The Gap Year Program

Gap year students will fulfill the traditional role of a medical assistant.

Responsibilities include:

- Taking patient histories and presenting patient directly to the provider
- Scribing for providers, coordinating patient care and scheduling
- Educating patients on biopsy/lab results, pre/post operative instructions, and treatment plans
- Suture removals & wound evaluations
- Prepping sterile surgical fields, injecting local anesthesia, and setting up surgical trays
- Potential experience in histology lab
- Directly assisting in procedures including:
 - Biopsies
 - Excisions
 - Mohs micrographic surgery
 - Reconstructive surgery
 - Cosmetic treatments
 - Vein treatments

In addition to direct patient care, you will gain an understanding of and help manage the back-end processes that keep an outpatient clinic running, including prescription drug access/ authorizations/ refills and patient flow.

Program Requirements

- Intention to matriculate in an MD, MD-PhD, or PA program at the conclusion of the fourteen- or twenty-six-month program is required.
- All program participants will be required to complete one project during their tenure at SCSP, which can involve any of the following:
 - Clinical research, case report or publication
 - Quality/workflow improvement
 - Patient education
 - Any other project approved by a physician including attending local dermatological academic conferences.

To apply, please submit a cover letter and one-page resume.

On site interviews will begin at the start of the calendar year. June and July are important opportunities for incoming gap year students to learn from outgoing medical students.

Skin Care Specialty Physicians (SCSP) is a busy outpatient dermatology and dermatological surgery practice in Lutherville, Maryland, directly north of Baltimore. We see approximately 220-275 patients a day and perform between 2000-2500 surgeries a year. We specialize in the management of all medical, surgical, and cosmetic skin conditions.
